Search in Swiss-Prot and TrEMBL for: clfa

Swiss-Prot Release 44.2 of 30-Jul-2004

TrEMBL Release 27.2 of 30-Jul-2004

- Number of sequences found in Swiss-Prot₍₀₎ and TrEMBL₍₃₎: 3
- Note that the selected sequences can be saved to a file to be later retrieved; to do so, go to the bottom of this page.
- For more directed searches, you can use the Sequence Retrieval System SRS.

Search in Swiss-Prot: There are matches to 0 out of 155596 entries

Search in TrEMBL: There are matches to 3 out of 1365262 entries

Q6GIK4

Clumping factor {GENE:Name=clfa} ORFNames=SAR0842} - Staphylococcus aureus subsp. aureus MRSA252

Q8NXJ1

Fibrinogen-binding protein {GENE:Name=clfa} - Staphylococcus aureus (strain MW2)

Q99VJ4

Fibrinogen-binding protein A, clumping factor {GENE:Name=clfa} - Staphylococcus aureus (strain N315)

in Swiss-Prot/TrEMBL by AC, ID, description,
gene name, organism

Please do NOT use any boolean operators (and,
or, etc.)

If you would like to retrieve all the Swiss-Prot/TrEMBL entries contained in this list, you can enter a file name. These entries will then be saved to a file under this name in the directory outgoing of the ExPASy anonymous ftp server, from where you can download it. (Please note that this temporary file will only be kept for 1 week.)

File name: Format: ☒ Swiss-Prot ☐ Fasta
